The brown spots on my face have been driving me crazy for years. Everyday I would spend nearly an hour trying to cover them with expensive makeup. After 3 treatments with Ultra, the spots have nearly disappeared! The amount of time I got back in addition to the money I'm saving on makeup is substantial and I couldn't be happier with the results!

-PATIENT J.C.

Frequently asked questions

Is there any downtime?

You will experience mild redness following your Ultra™ treatment and you will be able to resume normal activities immediately. Full healing may take 5 to 7 days but makeup may be applied sooner upon direction from your treatment provider.

How does it feel?

Discomfort during Ultra treatments is variable. Most patients describe the sensation as "mild to moderate" discomfort. Your provider may elect to apply a topical numbing cream to minimize discomfort.

How long does the treatment take?

Treatments range from 10-20 minutes, depending upon the area being treated. Some Ultra treatments are so quick that patients refer to it as a Lunchtime Facial!

How many treatments will I need?

In some cases, you may see results after a single treatment while other skin conditions could require several visits. Discuss your expectations with your provider.

ULTRA™

Clear, beautiful skin
for all skin types,
all year round

What is *Ultra*

Ultra™ is a low-downtime laser that revitalizes the skin, giving it a brighter tone and improved texture. Treatments can be customized for your particular needs and schedule.

“

"I spent so much time in the sun when I was younger, which caused patchy discoloration on my face and décolleté. Only 2 treatments with Ultra has turned back the hands of time, reversing sun damage and revealing a smooth, even-toned complexion that I didn't think was possible. It has improved my self-esteem so much, I can't wait for my next treatment!"

-PATIENT L.C.

Ultra can be used anywhere on the body. Contact your provider to discuss the right treatment for you.

What to expect from

ULTRA™

Your provider may apply numbing cream prior to your treatment.

Patients describe the Ultra treatment as a warm, tingling sensation, which may vary. The treatment time may range from 10-20 minutes or longer.

Immediately following the treatment, you will notice some redness which will lessen over the next day or so.

The following 5-6 days, your skin will have a dry, sandpaper-like texture. This is normal and will resolve as your skin exfoliates, revealing fresher, clearer skin.

Benefits of the Ultra treatment

Ultra is most often used to treat the Face, Neck, or Chest.

Ultra can treat mild to moderate:

- AGE SPOTS
- FRECKLES
- SUN SPOTS
- PIGMENTED LESIONS
- SUN DAMAGE
- ACTINIC KERATOSIS (PRE-CANCEROUS LESIONS)

The Ultra treatment creates tiny thermal zones in the skin, prompting the body to quickly generate new tissue.
